The bill to reorganize the Army was taken up in Committee, and a superlatively dry debate principally confined to the question of abolishing the offices of Superintendents of Armories, and leaving their duties to be performed by officers of the Ordnance Corps, (as provided in the second section of the bill,) continued during the day, in which, among others, Mesers. BARTON, SPRIGO and Goggin participated.

No action was taken on the bill.

The Army Appropriation bill was taken up and the House insisted on its amendments and appointed a Committee of Conference (to meet that to-day appointed on the part of the Senate.)

A resolution of Mr. STANLY to terminate debate on the bill to re-organize the Army, at three o'clock to-morrow (Wednesday) was adopted. The House adjourned. ARGUS.

OREGON TERRITORY .- Our Government is turning its attention seriously to the occupation of the Oregon Territory. As a preparatory step, an expedition has been recently sent out to explore the country betwen the navigable waters of the Missouri and Oregon rivers. The company consists of surveyors and engineers, and scientific men, well supplied with all the instruments and appliances necessary to effect a correct topographical survey, and is escorted by a sufficient number of troops to afford protection from the savage tribes that wander through the great Western wilderness. The main object of the expedition is to select the most eligible route for the location of a chain of forts, connecting the white settlements on the Missouri and the Columbia rivers. The establishment of military posts along the route will tend very much to facilitate the march of emigration in the direction of the Pacific Ocean. At present, the journey across the Rocky Mountains is attended with innumerable dangers, enough to deter any but the hardiest adventurers from encountering the risk. No single individual dare make the attempt .-Even large caravans, well guarded and protected by strong military escorts, are in constant jeopardy from the attacks of the Indians, whose hunting grounds are traversed by the company of travelers.

If, however, the intention of Government is carried into effect, comparative security will have been acquired against many of the dangers that now render the journey to the Pacific full of hazard to the pioneer. Whenever this desirable objust's attained, it may be expected that the tide of emigration will set in strong and wide for the shores of the Pacific. The Far West will then no longer be limited by the range of the Rocky Mountains, but its boundaries be pushed onward till they meet the waters of the distant ocean .-The prospects in that remoto region are sufficiently flattering to induce crowds to try the experiment of seeking their fortunes in a new country. Notwithstanding existing obstacles, extensive settlements are formed on the Columbia, and before many years it may be expected that the colonists will be strong enough to organise a Goverament of their own, and establish another Republic west of the Rocky Mountains. [N. O. Bulletin.

THE SEASON AND THE CROPS .- The dryest portion of our soil has suffered somewhat from the drought in this vicinity. The weather could not be better for securing the hay and grain than it has

been the last fort sight. The rye crop is every where mentioned as unusual in New England. The stalks of rve are more springing from a single kernel, the kernels are saore round, plump and numerous than we have ever before known them. The flour of rye early and well secured will this year be almost equal to the flour of wheat.

In the North part of New Hampshire and in Vermont the wheat crop looks fair to be as great as it ever was known. Take the two States together, we believe the bread stuffs for our entire population may this year be raised within our own borders. No country could go ahead faster than New England, if the products of our soil can be made equal to the consumption of our inhabitants; the balance of trade and wealth will, in that case be vastly in our favor.

In Vermont, the prospect was so discouraging for Indian corn from the cold month of May, that many farmers thought themselves more safe to sow wheat than plant corn. The late sowed wheat is said to be as good in prospect as the earlier sowed and all of it never stood better on the ground .-The crop of wheat on new or burnt ground upon our highest hills is always considered safe from the attacks of weevil or rust. [Hill's N. H. Pat.

THE SALT TRADE .- It is stated that half the salt works on the Onondaga Salt Springs Reservation, have been suspended, in consequence of 20 per cent ad valorem duty, at which foreign salt is now admitted. This rate of duty amounts to a trifle over 4 cents per bushel, whereas hitherto the rate of duty on foreign salt has been 10 cents per bushel.

The duty paid to the State on each bushel of salt made at Onondaga being 6 cents, our manufacturers cannot stand against the foreign salt which is fast coming in by way of St. Lawrence and the Canadas. The State is, therefore, losing-1st. the duty, 2d. the tolls on the salt sent out to market, 3d. the tolls on the return trade depending on the quantity of salt sold, and 4th. the profits to the persons, our own citizens, who are engaged in the salt trade, whether as capitalists and laborers connected with the manufacture, or us forwarders and leborers engaged in the transportation of the salt and the commodities purchased by it.

Such are some of the blessings to this State of the combined rule of Loco-Focoism and Tylerism. [Albany Daily Adv.

CAUTION .- Robert Thompson, a market-man, went to an apothecary of this city on Thursday evening last, in order to procure some anti-bilious pills; instead of these, he received six mercurial pills, which he took at once. In consequence, he died on the following Monday morning, in spite of [Baltimore Sun. every effort made.

We cannot find, after diligent inquiry, any cause for altering our statements respecting the anequalled quantity and luxuriance of the crops, and the excellent manner in which, through the fineness of the weather, they have been secured thus far. Never before was there such an immense yield in the Genesee Valley.

A FACT WORTH KNOWING.—Injustice, perjury and treachery may, perhaps, succeed for once with the public, and borrow for a while from hope a gay and flourishing appearace, but time betrays their weakness, and they fall into ruin themselves. In structures of every kind, the lower part should have the greatest firmness, so the grounds and principles of action shoule be just and true. Thus it is with principles of action shoule be just and true. Thus it is with those persons who have attempted to foist upon the public an article which they endeavor to represent as possessing virtues of equal magnitude to one of the most powerful and efficacious medicines ever introduced to the public—the Sarsaparilla and Tomato Bitters—sold wholesale and retail by Fred. Brown, No. 63 Washington-street, Boston. We have heard a number of our first physicians speak of them in terms of the highest praise; they all agree that it is the best alterative now in use for a debilitated system, or for dysoposia or indirection, weakness at the gromach, dizziness dyspepsia or indigestion, weakness at the stomach, dizziness or pains in the head, ac. in tact, they say it should be generally used as a spring medicine. The two articles of which they are principally composed are the pure extract of the best Spanish Sarsaparilla and the extract of Toma-

tees. All those affected with the above aliments should call and try a bottle.

A Grand Explosion in The Cariner at Washington may be expected. It is said on the best authority that at least three of the Secretaries since the third veto have declared that they cannot stay longer. We are sorry for this—for we heartily wish that peace and good feeling might prevail at a time when the public interests so argently demand it. But there is another explosion soon to occur, which we predict will be of infinite advantage to the nation and to the race. We are hot allowed to say all that we know about it—normay we disclose the name of our informant. But the public may rest assured that ere long all the quacks and charlatans who are opposing the onward course of intelligence, of freedem and of Peter's Lozenges and Pills will be scattered in confusion to the iour winds of heaven. "Messrs Sands—Gentlemen: Under a feeling sense of gratitude inherent to us all when suddenly relieved from suffering and disease, I now, as an act of justice due to you, and with a view of relieving the afflicted, make known to the world the inestimable benefit I have received from the the world the inestimable benefit I have received from the use of your Sarsaparilla. In the year 1832 I sailed from England in a vessel bound for Quebec, and white on the passage first discovered the disease which after proved to be a sore affliction; and truly I can say, 'from the crown of my head to the sole of my foot there was no soundness in me.' From the time first mentioned down until the present, a period of store than ten years, I have suffered all that human nature was capable of bearing. I have been under the care of the most distinguished physicians both in this country and in England, visited Bath, Cheltenham, Bristol and Gloucester, tried various specifics, among others a large quantity of Swaim's Panacea, used saiphur baths, &c &c. As a last resort I was induced to wrap myself up in tar ointment, keep anyself secluded, shanned by all, myself also ment, keep myself secluded, shunned by all, myself also shunning. I was induced to believe my case a hopeless one. In August lest, by the advice of friends, I went to the New-York City Hospital, but was there told that my case was incurable. The disease now eaveloped my whole body, rendering me almost helpless; the skin thickened and cracked, and blood and matter ran, and life itself became almost a burden. A few weeks since I was induced to use your Sarsaparilla by hearing it so highly recommended, having spent near \$3000 without obtaining but little relief. After using it a short time I found myself better, and now, After using it a short time I found myself better, and now, by using six or eight bottles, costing me less than ten dollars, I am well! Yes, I certify and declare to the world, that after spending near \$3000 in traveling and doctoring, and suffering more than can be told, I was perfectly cured by using your invaluable preparation of Sarsagarilla; and I now recommend it to all similarly nfflicted. Those wishing to know farther particulars will find me at my residence, No 27 Warren-street, N Y, where I shall be happy to communicate any thing in relation to the above cure. municate any thing in relation to the above cure. The following recommendation a papular medicine, is published for the information of those whom it may interest.

New-York, July 12, 1842.

Mr. Schring—Sir—Upon the recommendation of my physician, I commenced, about three weeks since, to take your Restorative Cordial as a remedy for Dyspepsia, with which complaint I have been for some time affected with which complaint I have been for some time anceted—and I think it my duty to state that I have found it extremely beneficial in my particular case. Before the use of your medicine my digestive organs were often torpid and inactive: and this state of things occasioned a frequent suspension of the action of the heart, one of the most death-like feelings with which a mortal can be visited. Your Cordial seems to have been precisely the kind of stomachic that I required: it has warmed and excited those organs. that I required: it has warmed and excited those organs, and imparted to them a proper tone and vigor of action .-Previous to its use I could not eat many things which I now take with impunity. I especially mention raspberries and currants. I have not yet taken two bottles of it. JAS. SMITH.

We noticed a few days since that the Bank of General Interest was in bad order. The Salem Gazette says that after making inquiries, the universal impression at Salem i that this Bank is as solvent as it is possible for any institution or person to be. The worst that is to be apprehended is the loss of a small per contage on the capital of the Back. The following are new counterteits according to Thomp-
